

- The most difficult part of the assignment was getting used to unit testing very often. I've never unit tested or used test driven development in my usual coding routine. But, attempting to implement it to ensure robustness and flexible code was very refreshing and I'm sure I will be using this in the future.
- Lines of Code: 204
- Lines of Code in Unit Tests: 121
- Unit Test Coverage is 85% measured by Junit
- Cyclomatic Complexity is because there are 4 different if conditions throughout the classes.
